RE: Experienced Radiological/Electronic Field Service Engineer

I am an experienced professional engineer interested in working in the radiation oncology field repairing electronic equipment. I believe that I possess the specialized skills that you are looking for and I would make a valuable addition to your company.

As my resume indicates, I have thirty-one years of experience in radiological engineering. My professional history includes positions such as routine maintenance and repair of radiation oncology machines. I have served as a field service engineer in traveling around to multiple centers in Baltimore to repair equipment for most of my career. I am hard working and I stay until the job is completed. I am willing to undergo any training to better my skills at your company.

My former employer and co-workers can attest to my ability to deploy high quality job skills with precision and adequacy. Upon your request, I can send you Letters of Recommendation from my former employer and co-workers. I am a team player that can handle any task that I am faced with. My even disposition and good attitude makes it easy for me to work well with others. I am confident in my ability to deliver excellent results in my daily job. Additionally, I can bring the following experience and skills to this position:

- Excellent math skills
- Handyman skills to fix any other task that needs to be done to make your company a better place to work.
- Strong work ethic

I have attached my resume for your review and I would greatly appreciate the opportunity to meet with you regarding your available position in the Baltimore area.

Sincerely yours,

Kevin Sanborn
